Who tells Italy's story when AI answers.

110 questions · 5 engines · 5 runs on the same day · 2,750 answers

Italy

DMO

17%

of answers cite at least one DMO ±—

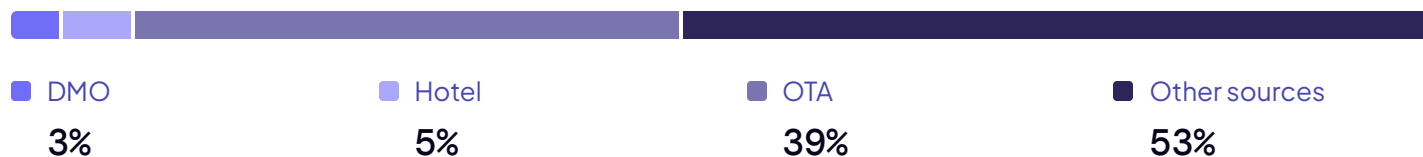

HOTEL

10%

of answers cite a hotel's own site ±—

out of 2,750 answers

OUT OF 100 CITED SOURCES

**3%**

of the sources cited here are a DMO's website. OTAs are 39%.

Category by category

	1 ^a	2 ^a	3 ^a
Sea	Sardegna 78%	Campania 76%	Sicilia 70%
Mountains	Veneto 82%	Abruzzo 76%	Valle d'Aosta 72%
Lakes	Lombardia 99%	Piemonte 72%	Trentino–Alto Adige 52%
Villages	Toscana 84%	Puglia 72% Italia.it	Lazio 64%
Cities	Toscana 99%	Veneto 98%	Lazio 90%
Snow	Trentino–Alto Adige 97%	Valle d'Aosta 89%	Veneto 77%
The region in general	Toscana 97%	Veneto 93%	Campania 87%

Method in short

Every month we ask the same set of travel questions to AI engines with web search: ChatGPT, Perplexity, Copilot, Grok and Google AI Mode.

Each question is asked **5 times on the same day** on every engine. The 5 answers become a single value, so model randomness is not mistaken for change.

For every answer we look at two things: **who is named** (destinations, hotels) and **who is the source** (the links cited), split into DMO, Hotel, OTA and Other.

Every month rankings are compared with the previous month's, on shared questions only: the ± next to each number is that change.
